

Online Only Modality

In this traditional distance learning modality, the instructor and students are all remote and online. **Synchronous** and **Asynchronous** learning elements should be provided so that students can engage in all of the same instructional and learning activities, as if meeting on-campus and in-person.

Live real-time student engagement can take place over the Zoom video conferencing platform. Zoom meetings must be recorded for students who cannot participate live.

Blackboard

Recordings of Zoom lectures should be posted on the Blackboard LMS, along with any class documents, assignments, and other class activities.
